

General Instructions for visiting and using the Nano Center facilities

last updated 9.11.2020

The Nano Center is providing services according to the "התו הסגול" regulations
We emphasize the importance of adhering to the rules when coming to the center:

General

1. Do not enter the center if you have fever or not feeling good
2. Register in the manual logbook at the entrance
3. Wearing a facemask all the time
4. Keeping distance
5. Frequent hand disinfection
6. Minimal "face to face" talks with our staff

Also pay attention to the work-specific emphases in each unit

Unit for Nano Fabrication (UNF):

Given the dress code within the unit, it is a fairly safe place for work. To better address the current situation, we will keep the following regulations:

- Keep the general above instructions when entering the center
- You must book your work in advance
- Please do not enter the staff room, if you need us - give us a call from the outside
- Each user will receive a personal "bunny suite" for use inside the clean room. Before leaving the clean room, please store your bunny suite in a designated drawer (to be supplied by the staff members) with your name on it for your use in the following sessions. The bunny suits will be send to laundry every few days
- Every user will get his own safety glasses, they will be in the same bag with the bunny suit
- There will be no more than 10 users max. inside the clean room.
The UNF team has the authority to regulate and limit the number of users inside the clean room
- If you are using the **glove box**:
 - Wear latex gloves over the lab robe to avoid arms to be bare and leave sweat inside the black gloves
 - Clean the glove box windows with Ethanol before every use
- For training sessions see separate protocol
- For any question, please contact the specific teammate or
Shimon: shimone@savion.huji.ac.il 02-6584062

Unit for Nano Characterization (UNC)

- Keep the general above instructions when entering the center
- Independent users can schedule and work after receiving an approval from Inna.
- We welcome short visits to bring the samples accompanied by the clear written contact details and description.
- Our team will not provide “face to face” service and clients will not be allowed to present at the measurement session
- For training sessions see separate protocol
- For any question, please contact the specific teammate or Inna: innap@savion.huji.ac.il ; 02 6584808

3D printing center

- Receiving orders as usual by our order form [Order form](#)
- There may be delays in supplying the products
- For any questions please contact huji3dpc@mail.huji.ac.il or yariv.pinto@mail.huji.ac.il 02-6585719

Help us protect the health and the safety of the entire community, including the employees and users of the center.

We wish you successful work and good health.
